The Immune System
Specific Defenses and Immune Disorders

1. one of the three characteristics of the specific immune response
2. another term for antibody
3. programmed cell death
4. an example of a Type II reaction
5. involved in Type IV reactions
6. desensitization therapy
7. a possible cause of secondary immunodeficiency
8. triggers an immune response
9. a type of antigen presenting cell
10. an antibody molecule
11. a treatment for hemolytic disease of the newborn
12. mediator of Type I hypersensitivity
13. an example of a Type III hypersensitivity
14. lack of response to self tissue
15. lack T cells and B cells
16. target of cytotoxic T cell
17. an activated B cell
18. a viral molecule would be an example
19. activated by antigen presented in MHC II
20. activated by antigen presented in MHC I
21. term used in describing Type IV reactions
22. an example of a of Type I hypersensitivity
23. released by degranulating mast cells
24. response to self antigens
25. an epitope would be an example
26. an example of a Type IV hypersensitivity
