

# Grants Collection

## Kennesaw State University

UNIVERSITY SYSTEM  
OF GEORGIA

Lei Li, Rebecca Rutherford, Svetlana Peltsverger,  
Jack Zheng, Zhigang Li, Nancy Colyar

---

# Advanced Databases

---

## Grants Collection

Affordable Learning Georgia Grants Collections are intended to provide faculty with the frameworks to quickly implement or revise the same materials as a Textbook Transformation Grants team, along with the aims and lessons learned from project teams during the implementation process.

Each collection contains the following materials:

- **Linked Syllabus**
  - The syllabus should provide the framework for both direct implementation of the grant team's selected and created materials and the adaptation/transformation of these materials.
- **Initial Proposal**
  - The initial proposal describes the grant project's aims in detail.
- **Final Report**
  - The final report describes the outcomes of the project and any lessons learned.

Unless otherwise indicated, all Grants Collection materials are licensed under a [Creative Commons Attribution 4.0 International License](https://creativecommons.org/licenses/by/4.0/).

## Prepared by

Dr. Lei Li  
 Dr. Rebecca H. Rutherford  
 Dr. Svetlana Peltsverger  
 Dr. Jack Zheng  
 Dr. Zhigang Li  
 Ms. Nancy N. Colyar

### Summary

This document contains detailed information about the four courses we developed and implemented. For each course, we included catalog description, learning objectives, developed learning modules, analysis of effectiveness of the developed material, and summary of the survey results.

### 1. IT 4153 Advanced Database – Supporting Material.

**Instructor:** Svetlana Peltsverger

Email: speltsve@kennesaw.edu

### Catalog Description

Prerequisite: CSE 3153 This course will study how databases are used with programming applications. Topics include advanced PL/SQL (or similar database programming language), database transaction, database security, database maintenance, and distributed and web databases.

### Course Outcomes

Students who complete this course successfully will be able to

1. Understand and describe current and emerging database models and technologies;
2. Develop functions and procedures for data manipulation and database access auditing;
3. Describe database monitoring and performance tuning;
4. Describe database security and administration issues, including backup and recovery;
5. Explain the concepts of data warehousing and data mining

### Textbook

There is no textbook assigned. All readings are assigned in weekly modules. I require that you read the relevant papers and tutorials each week as a way to prepare you for assigned lab/quiz. Knowledge of the readings will reduce the time it takes you to finish lab assignments.

### Course Modules

Topic	Assigned Reading
-------	------------------

<p>Module 1 SQL Review</p>	<p>1. SQL <a href="http://docs.oracle.com/database/121/CNCPT/sqlangu.htm#CNCPT015">http://docs.oracle.com/database/121/CNCPT/sqlangu.htm#CNCPT015</a> <i>Overview of the <b>Structured Query Language (SQL)</b> and how Oracle Database processes SQL statements.</i> <i>This chapter includes the following topics:</i></p> <ul style="list-style-type: none"> <li>• <i>Introduction to SQL</i></li> <li>• <i>Overview of SQL Statements</i></li> <li>• <i>Overview of the Optimizer</i></li> <li>• <i>Overview of SQL Processing</i></li> </ul> <p>2. <a href="http://www.tomjewett.com/dbdesign/dbdesign.php?page=tables.php">http://www.tomjewett.com/dbdesign/dbdesign.php?page=tables.php</a> <i>Information of basic structures of rows and tables , such as representation of data in rows. It also gives definition of tables , constraint and different keys such as Primary, super key.</i></p> <p>3. Associations <a href="http://www.tomjewett.com/dbdesign/dbdesign.php?page=association.php">http://www.tomjewett.com/dbdesign/dbdesign.php?page=association.php</a> <i>Information about the various UML associations, relational schema, foreign keys, the concept of parent and child table and referential integrity.</i></p> <p>4. Keys <a href="http://www.tomjewett.com/dbdesign/dbdesign.php?page=keys.php">http://www.tomjewett.com/dbdesign/dbdesign.php?page=keys.php</a> <i>Information about keys such as Candidate keys, size of Primary keys.</i></p> <p>5. <a href="http://technet.microsoft.com/en-us/library/cc505842.aspx">http://technet.microsoft.com/en-us/library/cc505842.aspx</a> <i>How to design a normalized database , First Normal Form, Second Normal Form, third normal form and then practice of normalizing the database with examples.</i></p> <p>6. <a href="http://technet.microsoft.com/en-us/library/cc505841.aspx">http://technet.microsoft.com/en-us/library/cc505841.aspx</a></p>
<p>Module 2 Introduction to SQL Procedures &amp; Functions</p>	<p>1. PL/SQL Language Fundamentals <a href="http://docs.oracle.com/database/121/LNPLS/fundamentals.htm#LNPLS99920PL/">http://docs.oracle.com/database/121/LNPLS/fundamentals.htm#LNPLS99920PL/</a> <i>Explains these following aspects of the PL/SQL language:</i></p> <ul style="list-style-type: none"> <li>• <i>Character Sets</i></li> <li>• <i>Lexical Units</i></li> <li>• <i>Declarations</i></li> <li>• <i>References to Identifiers</i></li> <li>• <i>Scope and Visibility of Identifiers</i></li> <li>• <i>Assigning Values to Variables</i></li> <li>• <i>Expressions</i></li> <li>• <i>Error-Reporting Functions</i></li> <li>• <i>SQL Functions in PL/SQL Expressions</i></li> <li>• <i>Pragmas</i></li> <li>• <i>Conditional Compilation</i></li> </ul> <p>2. SQL Subprograms <a href="http://docs.oracle.com/database/121/LNPLS/subprograms.htm#LNPLS008">http://docs.oracle.com/database/121/LNPLS/subprograms.htm#LNPLS008</a> <i>Reasons to Use Subprograms, Nested, Package, and Standalone Subprograms, Subprogram Invocations, Subprogram Parts, Forward Declaration, Subprogram Parameters, Subprogram Invocation Resolution, Overloaded Subprograms, Recursive Subprograms, Subprogram Side Effects, PL/SQL Function Result Cache, PL/SQL Functions that SQL Statements Can</i></p>

	<i>Invoke, Invoker's Rights and Definer's Rights (AUTHID Property), External Subprograms.</i>
Module 3 Advanced SQL Procedures & Functions	<p>1. Using PL/SQL Control Structures  <a href="http://docs.oracle.com/cd/B28359_01/appdev.111/b28370/controlstructures.htm#BABDAEGB">http://docs.oracle.com/cd/B28359_01/appdev.111/b28370/controlstructures.htm#BABDAEGB</a>  <i>How to use testing conditions such as: IF-THEN statement, IF-THEN-ELSE statement, IF-THEN-ELSIF statement, Simple case statement, Searched case statement, Guidelines for IF and CASE statements with examples.</i></p>
Module 4 Overview of Database Administration	<p>1. Oracle Triggers  <a href="http://docs.oracle.com/database/121/CNCPT/srvrside.htm#CNCPT218">http://docs.oracle.com/database/121/CNCPT/srvrside.htm#CNCPT218</a>  <i>Creation of triggers with syntax and explanations of basic components in PL/SQL triggers, examples of creating triggers, Invoking Row-level triggers.</i></p> <p>2. Enforcing business rules with triggers <a href="https://technet.microsoft.com/en-us/library/aa214450(v=sql.80).aspx">https://technet.microsoft.com/en-us/library/aa214450(v=sql.80).aspx</a>  <i>This is about enforcing business rules with triggers, comparison of triggers with constraints in enforcing business rules.</i></p>
Module 5 Database Environment	Modules 1 - 4
Module 6 Database and Application Design	<p>1. Guidelines for the Database Specifications  <a href="http://gametlibrary.worldbank.org/FILES/966_Database Specification Checklist.doc">http://gametlibrary.worldbank.org/FILES/966_Database Specification Checklist.doc</a>  <i>Database Specification checklist, this checklist is provided as part of the evaluation process for the Database Specifications. The checklist assists designated reviewers in determining whether specifications meet criteria established in HUD's System Development Methodology (SDM). The objective of the evaluation is to determine whether the document complies with HUD development methodology requirements.</i></p> <p>2. ACID Properties  <a href="http://docs.oracle.com/cd/E35855_01/tuxedo/docs12c/ads/adtrn.html">http://docs.oracle.com/cd/E35855_01/tuxedo/docs12c/ads/adtrn.html</a>  <i>Explanations about transactions covers: definition of transaction, Benefits of using transaction, example of global transaction, what is Oracle tuxedo Transaction manager, how system tracks distributes transaction processing, how system uses a two-phase commit to commit transaction.</i></p> <p>3. Naming Convention <a href="http://ss64.com/ora/syntax-naming.html">http://ss64.com/ora/syntax-naming.html</a>  <i>Oracle naming conventions about tables names, field names, primary key fields, view names, index names, naming constraints, naming about other fields, SQL keywords, PL/SQL naming, instances, naming data files, tablespaces, REDO logs and at last summary of Naming conventions.</i></p> <p>4. Data Dictionary  <a href="http://docs.oracle.com/database/121/CNCPT/datadict.htm#CNCPT1210">http://docs.oracle.com/database/121/CNCPT/datadict.htm#CNCPT1210</a>  <i>This explains storage of the data dictionary, how oracle databases use the Data Dictionary, public synonyms for data dictionary views, data dictionary cache.</i></p>

<p>Module 7 Data Availability and Change Managem ent</p>	<ol style="list-style-type: none"> <li>1. Creating Indexes in Oracle <a href="http://docs.oracle.com/database/121/ADMIN/indexes.htm#ADMIN016">http://docs.oracle.com/database/121/ADMIN/indexes.htm#ADMIN016</a> <i>Oracle documentation of managing indexes. Chapter covers: Indexes, guidelines for managing indexes, creating indexes, altering indexes, monitoring space use of indexes, dropping indexes, indexes data dictionary views.</i></li> <li>2. Oracle Data structure denormalization <a href="http://www.dba-oracle.com/art_9j_denormal.htm">http://www.dba-oracle.com/art_9j_denormal.htm</a> <i>Detailed description of Oracle Data Structure denormalization. Also explains when to add redundancy and violate third normal form, planned data denormalization, Snapshots, Varrays, Oracle Materialized view with examples and at last the conclusion.</i></li> <li>3. Isolation <a href="http://en.wikipedia.org/wiki/Isolation_%28database_systems%29">http://en.wikipedia.org/wiki/Isolation_%28database_systems%29</a> <i>Wikipedia article of Isolation of Database systems covers: concurrency control, different Isolation levels, and default isolation level.</i></li> </ol>
<p>Module 8 Performanc e Managem ent</p>	<ol style="list-style-type: none"> <li>1. Oracle Database High Availability <a href="http://www.oracle.com/technetwork/database/availability/maximum-availability-wp-12c-1896116.pdf">http://www.oracle.com/technetwork/database/availability/maximum-availability-wp-12c-1896116.pdf</a> (pp 3-23) <i>Oracle documentation of Maximize Availability with Oracle Database 12c. It contains Oracle database high availability, addressing unplanned downtime, addressing planned downtime and managing Oracle Database High availability Solutions.</i></li> <li>2. Database Performance Analyzer <a href="http://www.solarwinds.com/database-performance-analyzer-oracle.aspx">http://www.solarwinds.com/database-performance-analyzer-oracle.aspx</a> (watch now link) <i>Talk about Database Performance Analyzer.</i></li> </ol>
<p>Module 9 Database Security</p>	<ol style="list-style-type: none"> <li>1. Managing Security for Oracle Database Users <a href="https://docs.oracle.com/database/121/DBSEG/users.htm#DBSEG99778">https://docs.oracle.com/database/121/DBSEG/users.htm#DBSEG99778</a> <i>Oracle documentation of Creating a New User Account and Granting the User the Minimum Database Privileges, contains: example of create user statement and grant statement.</i></li> <li>2. Guidelines for choosing account names <a href="http://www.indiana.edu/~dss/Services/Naming/nvgbns.html">http://www.indiana.edu/~dss/Services/Naming/nvgbns.html</a> <i>Oracle documentation of creating a new user account and granting the user the minimum database privileges, with examples of creating users and also contains guidelines or restrictions on creating user name for a account.</i></li> <li>3. Oracle security check lists <a href="http://web.nvd.nist.gov/view/ncp/repository?keyword=oracle&amp;startIndex=0">http://web.nvd.nist.gov/view/ncp/repository?keyword=oracle&amp;startIndex=0</a> <i>National vulnerability database which contains security checklist that provides detailed low level guidance on setting the security configuration of operating systems and application, it has security checklist for Oracle 10g, 11g and 12c also.</i></li> <li>4. Multitenant Architecture <a href="https://docs.oracle.com/database/121/CNCPT/cdbovrvw.htm#CNCPT89234">https://docs.oracle.com/database/121/CNCPT/cdbovrvw.htm#CNCPT89234</a> <i>Oracle documentation of Introduction to the Multitenant Architecture, it contains: about the multitenant architecture, benefits of multitenant</i></li> </ol>

	<i>architecture, path to database consolidation and multitenant environment documentation roadmap.</i>
Module 10 Database Backup and Recovery	<p>1. Oracle Backup and Recovery  <a href="http://docs.oracle.com/database/121/BRADV/toc.htm">http://docs.oracle.com/database/121/BRADV/toc.htm</a> (48 pages)  <i>Oracle documentation of Database Backup and Recovery User's Guide, it contains links for: Overview of Backup and Recovery, Starting and Configuring RMAN and Flashback Database, Backing Up and Archiving Data, Managing RMAN Backups, Diagnosing and Responding to Failures, Tuning and Troubleshooting, Transferring Data with RMAN and Performing User-Managed Backup and Recovery.</i></p>
Module 11 Data Warehouse	<p>1. Oracle Database/ Data Warehousing Guide/ 12c  <a href="https://docs.oracle.com/database/121/DWHSG/toc.htm">https://docs.oracle.com/database/121/DWHSG/toc.htm</a> (chapters 1, 2 and 3 will be included in the test 2)  <i>Oracle documentation of Database Data Warehousing Guide. It contains links for: Data Warehouse - Fundamentals, Optimizing Data Warehouses, Data Movement/ETL and Relational Analytics.</i></p> <p>2. The Top 10 Trends In Data Warehousing  <a href="http://www.forbes.com/sites/oracle/2014/03/10/the-top-10-trends-in-data-warehousing/#698f7f811123">http://www.forbes.com/sites/oracle/2014/03/10/the-top-10-trends-in-data-warehousing/#698f7f811123</a>  <i>A new white paper from Oracle explores the top 10 trends and opportunities in data warehousing. Here's a recap of that Top 10 list along with my own take on each trend.</i></p> <p><b>Additional reading</b></p> <p>1. Text mining examples  <a href="http://lesswrong.com/lw/8ep/the_promise_of_connected_science/">http://lesswrong.com/lw/8ep/the_promise_of_connected_science/</a>  <i>A blog on the promise on connected science.</i></p> <p>2. <a href="http://www.anderson.ucla.edu/faculty/jason.frand/teacher/technologies/palace/datamining.htm">http://www.anderson.ucla.edu/faculty/jason.frand/teacher/technologies/palace/datamining.htm</a>  <i>An article on Data mining, contains definitions of: Data, Information, and Knowledge and Data Warehouses. Also it explains: What can data mining do?, How does data mining work?, and What technological infrastructure is required.</i></p> <p>3. <a href="http://www.thearling.com/text/dmwhite/dmwhite.htm">http://www.thearling.com/text/dmwhite/dmwhite.htm</a>  <i>An article on An Introduction to Data Mining, topics include: Overview, The Foundations of Data Mining, The Scope of Data Mining, How Data Mining Works, An Architecture for Data Mining, Profitable Applications and conclusion.</i></p> <p>4. <a href="http://insights.wired.com/profiles/blogs/top-10-big-data-use-cases-to-watch#axzz3R6BmW2gK">http://insights.wired.com/profiles/blogs/top-10-big-data-use-cases-to-watch#axzz3R6BmW2gK</a>  <i>An article of Top 10 Big Data Use Cases to Watch, the top 10 key enterprise use cases for big data, what these use cases are, why companies are investing in them, and their common reference architectures.</i></p>
Module 12 NoSQL Databases	<p>1. NoSQL <a href="http://www.w3resource.com/mongodb/nosql.php">http://www.w3resource.com/mongodb/nosql.php</a>  <i>An article about NoSQL. Topics includes: Introduction, Classical relation database follow the ACID Rules, Distributed Systems, Advantages of Distributed Computing, Disadvantages of Distributed Computing, Scalability,</i></p>

	<p><i>What is NoSQL , Why NoSQL with examples, RDBMS vs NoSQL, RDBMS vs NoSQL, CAP Theorem (Brewer's Theorem), NoSQL pros/cons, The BASE, NoSQL Categories, Key-value stores, Column-oriented databases, Graph databases, Document Oriented databases, Production deployment and aat last summary in a video.</i></p> <p>2. MongoDB <a href="https://docs.mongodb.org/manual/introduction/">https://docs.mongodb.org/manual/introduction/</a> <i>MongoDB documentation of Introduction to MongoDB. This document contains topics: Document database and Key features of MongoDB.</i></p> <p>3. MongoDB Installation <a href="http://docs.mongodb.org/manual/tutorial/install-mongodb-on-windows/?_ga=1.227014557.1276862453.1418932796">http://docs.mongodb.org/manual/tutorial/install-mongodb-on-windows/?_ga=1.227014557.1276862453.1418932796</a> <i>MongoDB documentation of Install MongoDB Community Edition on Windows. Topics includes: Overview, Requirements, Get MongoDB Community Edition, Install MongoDB Community Edition, Run MongoDB Community Edition, Configure a Windows Service for MongoDB Community Edition, Manually Create a Windows Service for MongoDB Community Edition and some Additional Resources.</i></p>
--	---

## 2. IT 5433 – Database Design and Applications Supporting Material

**Instructor:** Dr. Lei Li

**Email:** [lli13@kennesaw.edu](mailto:lli13@kennesaw.edu)

### **Catalog Description:**

This course will provide a practical foundation of database systems with emphasis on relational database design, implementation, and management. Topics include normalization, ERD, logical and physical design, SQL query, database applications, usage of XML in database, and data warehouse.

### **Learning Objectives:**

Students who complete this course successfully will be able to:

1. Compare and contrast the basic database models;
2. Analyze, design, develop and implement a relational database system based on business requirements;
3. Create, modify and query databases using the SQL language;
4. Analyze the major aspects of database administration and compare and contrast issues of database security;
5. Describe XML and its use in database systems;
6. Conduct independent research on a subject related to the course material.

### **Learning Modules**

<p><b>LM1. Database Environment</b></p> <p>Learning objectives:</p> <ol style="list-style-type: none"> <li>1. Understand key terms in database</li> <li>2. Explain file processing systems</li> <li>3. List parts of a database environment</li> <li>4. Explain types of database develop approaches</li> </ol>

## 1. PROJECT GOALS

In this project, we take a department-wide effort to transform all learning materials used in four database related courses. All selected courses will adopt no-cost-to-students learning material that offers equivalent or better educational effectiveness. These resources will be used for both in-class and online database students.

### 1.1 STATEMENT OF TRANSFORMATION

#### The Transformation

The textbooks used in four proposed database related courses are quite expensive (see Table 1 above). In fact, most textbooks on databases are quite expensive in general. In addition, due to the fast evolving nature of the technology field, the textbooks used in the proposed courses are updated frequently, which negatively impacts their resale value.

#### The Stakeholders

There are two primary sets of stakeholders for this proposal – the students taking the four database classes (both in-class and online students), and the faculty developing and teaching the database courses. The high costs of textbooks put a big financial burden on students and may become a road block for students' ability to finish their education. Our team of investigators strives to make the higher education more affordable to the students. The database related learning materials are widely available on the World Wide Web today, and some of them have been created by our faculty members. Many of these resources are publicly accessible, free, or with an open license to use. These materials include open and free tutorials, books, videos, labs, test banks, software, and services. For example, major database vendors such as Oracle and Microsoft published abundant tutorials and examples of their products on their websites. Oracle provides VMs with preinstalled Oracle DBMS (current version 12c). Microsoft Azure grants are widely available for faculty who needs free instances of MS SQL server (current version 2014) or Linux/Windows VMs.

Many of the textbooks become outdated at the moment they are published, while digital delivery of the learning materials makes it easier to keep the content up-to-date. Developing and assembling a set of learning materials for all database-related courses at the same time is a unique approach. It will not only allow us to target the outcomes of each course, but also target the outcomes of the Information Technology program.

Compared to traditional textbooks, the Web resources have many benefits: 1) the Web resources are generally free to use; 2) they are constantly being updated and always reflect the latest trends and industrial development; 3) the materials from the Web are also more dynamic and interactive. The pitfalls of Web resources are that they are often disorganized and may contain inaccurate information. However, our team of investigators are not only subject matter experts in the database field, but also are proficient educators who on average have more than 10 years teaching experience. We will select, organize and integrate resources from the Web and transform the

information into instructionally sound learning materials for the proposed courses. We strongly believe that the new learning materials will offer equivalent or better learning effectiveness compared to the original textbooks. Digital delivery also allows us to add interactive elements into the learning materials. The interactive content will not only engage the students, but also improve their learning experience. It will also help to enhance the learning outcomes and learning satisfaction.

### **The Impact**

The impact of our transformation efforts will be profound. By our estimates, 400 to 500 students will benefit from the no-cost learning material each year. Because of the cost savings from not having to buy textbooks, students may be able to take a few more courses each year and graduate sooner. Having a series of database courses adapting no-cost-to-students material not only offers better and more consistent learning experience to students, but also makes our renowned IT program more affordable. As a result, our IT program could recruit more students and produce more qualified IT professionals that Georgia needs. Our experience gained in this transformation project could be useful to other programs or departments who want to lower the cost of the education to their students. In summary, we believe the proposed project will have a positive impact in students' retention, progression, and graduation at program, department and institution level.

## **1.2 TRANSFORMATION ACTION PLAN**

With a coordinated effort, the department investigators plan the following activities to transform all database related courses to completely use no-cost learning materials:

- Research and identify no cost content readings for each of the learning modules in each course. The reading list includes both required readings and optional readings. All of these readings will be publicly accessible, free to use, or openly licensed.
- Research and identify the no cost material that can be shared across the courses.
- Develop study guides and lecture notes for students' use to review course content and key learning points.
- Adopt or develop all assignments, exercises and lab materials that are no cost to students to replace the ones in the textbooks.
- Develop test banks to replace the ones in the textbooks.
- Adopt open source or no-cost-to-students database software for students to gain hands-on experience.
- Update the syllabus to include major resources and no cost materials.
- Update the D2L accompanying sections for online students to match the resources for the in-class students.

There will be one course architect for each course who will be the main person to develop the course. The responsibilities of each PI is described in table 2.

**Table 2. PI responsibilities**

<b>Primary Investigator</b>	<b>Course</b>	<b>Responsibilities</b>
Dr. Lei Li	IT 5433	Coordinate project activities; subject matter expert and developer; instructor of record
Dr. Rebecca Rutherford	CSE 3153	Subject Matter Expert and developer; instructor of record
Dr. Svetlana Peltsverger	IT 4153	Subject Matter Expert and developer; instructor of record
Dr. Jack Zheng	IT 4713/6713	Subject Matter Expert and developer; instructor of record
Dr. Zhigang Li		Provide Instructional Design and Hosting Support.
Ms. Nancy N. Colyar		Provide support in searching learning material, and handling license and copyright issues of no-cost material.

All course design with the no-cost materials will be provided through USG LMS D2L Brightspace for our students and on CourseSites for the public.

### **1.3 QUANTITATIVE AND QUALITATIVE MEASURES**

The investigators plan to assess the effectiveness of our proposal in two ways: 1) qualitatively, we will design a survey and gather inputs from the students after they used the no-cost learning material; 2) quantitatively, we will compare students' performance data gathered from sections using traditional textbooks and sections using no-cost learning material.

The investigators will establish baseline data on student pass rates for the five courses over the last two years – 2013 and 2014. This data will be used as a baseline for comparison of student performance in courses with alternative no cost material. The detailed assessment plan is shown in table 3.

For each of the measurement, the investigators are going to conduct two levels of analysis:

1. Comparing them to the preset goals. Generally, 75% is the aimed passing rate in undergraduate courses and 80% in graduate courses.
2. Comparing them to those from past offerings where costly textbooks were used. The investigators will obtain the data from the sections taught in the past 2 years.

**Table 3. Assessment Plan**

Source	Description
Student performance measures	This data is from the overall class performance based on the grading of student works. Metrics include: <ul style="list-style-type: none"> <li>• Class average, grades distribution, pass rate for each grading item.</li> <li>• Overall letter grades distribution, pass rate, withdraw rate, and fail rate.</li> <li>• Percentage of students meeting or exceeding learning outcomes</li> </ul>
Specific survey on no-cost learning materials.	The survey will be distributed at the end of the semester to collect student feedback. It consists of a mixture of quantitative and qualitative measures including: <ul style="list-style-type: none"> <li>• Student perception and attitude toward no cost materials</li> <li>• Quantitative ratings of the no cost materials used in this course</li> <li>• Qualitative comments and suggestions</li> </ul>
Student evaluation of the instructor	Formal student evaluation of the instructor can also provide information about teaching effectiveness using no cost materials. This evaluation is based on standardized forms for every course.

**1.4 TIMELINE**

The major milestones of the proposal are illustrated in table 4.

**Table 4. Major Milestone**

Milestone dates for fall 2015 implementation	Milestone dates for spring 2016 implementation	Milestone
5/01/2015		<ul style="list-style-type: none"> <li>• Complete baseline gathering of statistics</li> </ul>
6/30/2015	10/30/2015	<ul style="list-style-type: none"> <li>• Complete course modules redesign to use the no cost materials. These include all reading, lecture notes, video clips, exercises, labs, and assignments. The changes are reflected in the learning modeling study guides.</li> </ul>
7/31/2015	11/30/2015	<ul style="list-style-type: none"> <li>• Complete course level materials redesign. This includes quizzes, tests, and syllabus.</li> </ul>
10/31/2015	3/31/2016	Develop a survey of using the no cost materials to replace textbook.
12/8/2015	5/8/2016	<ul style="list-style-type: none"> <li>• Complete the course offering.</li> <li>• Complete the survey data collection.</li> <li>• Complete student evaluation.</li> </ul>
12/15/2015	5/15/2016	<ul style="list-style-type: none"> <li>• Complete assessment data collection and analysis.</li> <li>• Deliver the status report.</li> <li>• Compile final report.</li> </ul>

## 1.5 BUDGET

The funding mainly compensates our team of investigator's work and activity beyond normal teaching load or other job responsibilities in order to successfully complete the project. The role each PI is illustrated in table 2. For each proposed course, course architects approximately will spend at least 80 hours in developing the no-cost learning material and instructor of records, will spend 20 hours in course assessment. Instructional support and librarian would devote at least about 50 hours in assisting course architects. Thus, we request the budget of this project as follows.

Investigators compensation:  $\$5,000 * 6 = \$30,000$

Travel: \$800

Total Budget: \$30,800

Only open source software or free software will be used in this project thus there is no additional spending on software or equipment purchasing.

## 1.6 SUSTAINABILITY PLAN

The IT department implemented a course architect system for all courses. A course architect updates course content based on research, publications and feedback from students and alumni. Each of co-PI is a course architecture for corresponding courses (please see table 2). A course architect develops and maintains the course materials and teaching plans. He/she also teaches the course at least once a year to make sure all resources are valid and make necessary changes. This makes sure all no-cost materials and resources are highly sustainable in the future offerings of this course.

## 1.7 REFERENCES & ATTACHMENTS

Two letters of support from the VPAA and the chair of Information Technology Department of SPSU are attached.

**PROPOSAL SUBMISSION: ALL PROPOSAL DOCUMENTS, REFERENCES, AND ATTACHMENTS MUST BE SUBMITTED IN A SINGLE EMAIL TO [ALG@GATECH.EDU](mailto:ALG@GATECH.EDU).**

**DEADLINE FOR CATEGORY 4: 5:00 PM, DECEMBER 8, 2014**

December 5, 2014

Dear Affordable Learning Georgia (ALG) Grant Reviewers,

It is my pleasure to write this letter in support of the proposal, "Transformations-At-Scale for Department-Wide Database Related Courses", submitted by Dr. Li, Dr. Rutherford, Dr. Peltsverger, Dr. Zheng, Dr. Li, and Ms. Colyar from our Information Technology (IT) Department at Southern Polytechnic State University (SPSU)/Kennesaw State University.

In this project, the primary investigators will work as a team to replace existing costly textbooks in four database related courses with no-cost-to-students learning materials. Their efforts will significantly lower the cost of education for students and generate immediate and positive impact on the retention, progression, and graduation for the College of Computing & Software Engineering.

The investigators in this project are also designated course architects who are responsible for the development and the maintenance of the to-be-transformed courses. The developed no-cost-to-students material will be distributed using the course management system, GeorgiaView Desire2Learn. Thus, I believe the effort of this project will be sustainable over the long term.

In conclusion, I wholeheartedly support the efforts of Drs. Li, Rutherford, Peltsverger, Zheng, and Li, and Ms. Colyar as they seek this funding. This proposal has the full support of the Office of the Vice President for Academic Affairs.

Sincerely,

C. Richard Cole, AIA, NCARB  
Vice President for Academic Affairs

Dear ALG Grant Review Committee Members:

As the Chair of the Department of Information Technology at Southern Polytechnic State University (SPSU) I strongly support project "Transformations-At-Scale for Department-Wide Database Related Courses", submitted by Dr Li, Dr. Rutherford, Dr. Peltsverger, Dr. Zheng, Dr. Li and Ms. Colyar.

The project will have a significant and immediate positive financial effect on 500-600 students, and will make our IT program more affordable. As a result, more students will be able to enroll in the program and Georgia will have more qualified IT professionals. This project aligned with USG's Strategic Imperative 1 to provide high quality and affordable education to Georgians

The primary investigators will disseminate the no-cost materials through USG LMS D2L/Brightspace for SPSU students, and on Course Sites for the public.

To ensure the sustainability of the project over the long term, each course has assigned course architect who is responsible for design, development and maintenance of no-cost-to-students learning materials.

Developing and assembling a set of learning materials for all database-related courses at the same time is a unique approach. It will not only allow IT department to target the outcomes of each course, but also target the outcomes of the Information Technology program.

In closing, I encourage the ALG grant representatives to fund this project. The potential impact on students will be significant and sustainable over the long term.

Sincerely,

 12/8/2014

Svetlana Peltsverger, PhD, CISSP  
Chair, Information Technology Department  
School of Computing and Software Engineering  
Southern Polytechnic State University

# Final Report

---

# Affordable Learning Georgia Textbook Transformation Grants

## Final Report

**Date:** 5/13/2016

**Grant Number:** #119

**Institution Name(s):**

Kennesaw State University (previously Southern Polytechnic State University)

**Team Members (Name, Title, Department, Institutions if different, and email address for each):**

Dr. Lei Li, Associate Professor, Information Technology Department, lli13@kennesaw.edu

Dr. Rebecca H. Rutherford, Professor & Interim Dean of Honor College,  
brutherford@kennesaw.edu

Dr. Svetlana Peltsverger, Interim Associate Dean of College of Computing and Software  
Engineering, speltsve@kennesaw.edu

Dr. Guangzhi Zheng, Assistant Professor, Information Technology Department,  
gzheng@kennesaw.edu

Dr. Zhigang Li, Instructional Designer, Adjunct Professor, Information Technology Department,  
zli8@kennesaw.edu

Ms. Nancy N. Colyar, Director, Lawrence V. Johnson Library, ncolyar@kennesaw.edu

**Project Lead:** Dr. Lei Li

**Course Name(s) and Course Numbers:**

CSE 3153 Database Systems (fall 2015)

IT 4153 Advanced Database (spring 2016)

IT 4713/6713 Business Intelligence Systems (fall 2015)

IT 5433 Databases: Design and Applications (spring 2016)

**Semester Project Began:** Spring 2015

**Semester(s) of Implementation:** Fall 2015 and Spring 2016

**Average Number of Students Per Course Section:**

Courses	Enrollment
CSE 3153 Database Systems	31
IT 4153 Advanced Database	36
IT 6713 Business Intelligence Systems	26
IT 5433 Databases: Design & Applications	27
Average:	30

**Number of Course Sections Affected by Implementation: 4**

**Total Number of Students Affected by Implementation: 120**

**No-Cost-Learning Material Links:**

<b>Courses</b>	<b>Links</b>
CSE 3153 Database Systems	<a href="http://ksuweb.kennesaw.edu/~l113/CSE3153.html">http://ksuweb.kennesaw.edu/~l113/CSE3153.html</a>

## 1. Narrative

A. Describe the key outcomes, whether positive, negative, or interesting, of your project.

Overall, our project is very successful. Overwhelming majority of the students (85%) indicated positive experience with the open-access-free learning material we created. The student success rates in the four participating classes is over 93%. By estimate, our project saved our students \$110,419! Our ALG grant along with other KSU ALG recipients are recognized by Kennesaw State University (KSU) in a campus wide announcement.

The transformation process also has positive impact on the instructors. The use of open access materials ensures the flexibility and customized reading materials for our courses which is critical for a project based teaching/learning approach.

Lessons learned:

1. Providing too many choices for reading materials confuses students. Providing too few choices does not provide diverse points of view and enough examples. It may take a couple of semesters to reach a sweet spot.
2. KSU uses Digital Measures to evaluate teaching. There are two questions about textbooks: 1) The textbook was clear and understandable (0-4) and 2) I used the textbook very often (0-4). There is no N/A option, so some students skipped these questions and some chose disagree. We need to modify student survey to correctly collect information about instructional materials.

## 2. Quotes

- Provide three quotes from students evaluating their experience with the no-cost learning materials.

*“Saving money on a textbook was fantastic and a welcomed addition. It's also preferred to have access to any learning materials online and available to download. This class and professor got it right” –IT 5433.*

*“I enjoy not getting ripped off every semester by having to pay the unreasonably high prices for textbooks that basically cover the same information that is freely available on the Web. So, I am very supportive of Open materials being utilized in the program”. –IT 5433.*

*“Open and free learning materials can be much more useful than textbooks as long as they're picked well (as they were in this course)”. – IT 6713*

*“... conventional "Textbooks" are a horribly overpriced and seldom worth the cost. ... I appreciate the money savings in online resources, and use them in my work every day”. – IT 6713*

### 3. Quantitative and Qualitative Measures

#### 3a. Overall Measurements

##### Student Opinion of Materials

**Was the overall student opinion about the materials used in the course positive, neutral, or negative?**

As the table below indicates, overwhelming majority of students hold positive opinion on the material used in the courses.

Courses	Total number of Respondents	Opinion on the non-cost-material		
		Positive	Neutral	Negative
CSE 3153 Database Systems	31	87%	6.5%	6.5%
IT 4153 Advanced Database	36	81%	11%	8%
IT 6713 Business Intelligence Systems	8	87.5%	0%	12.5%
IT 5433 Databases: Design & Applications	27	85%	11%	4%

##### Student Learning Outcomes and Grades

**Was the overall comparative impact on student performance in terms of learning outcomes and grades in the semester(s) of implementation over previous semesters positive, neutral, or negative?**

Due to the consolidation of SPSU and KSU, we don't have access to comparable students' performance data for three of the four courses. However, the performance data for current courses are very positive.

Courses	Semester 1		Semester 2		Comparison
	Number of Students	Success Rate	Number of Students	Success Rate	
CSE 3153 Database Systems	NA	NA	31	93.5%	Positive
IT 4153 Advanced Database	NA	NA	38	87%	Positive
IT 4713 Business Intelligence Systems	NA	NA	24	96%	Positive
IT 5433 Databases: Design & Applications	24	100%	33	97%	Neutral

Note: 1) Success rate = total number of students with passing grade/total number of students who completed the courses. 2) Semester 1 refers to the semester where traditional textbook was used. Semester refers to the semester where no-cost-learning material was used. Due to the consolidation of SPSU and KSU, the student performance and enrollment of data from previous sections got lost. We use “NA” for those course sections.

### Student Drop/Fail/Withdraw (DFW) Rates

**Was the overall comparative impact on Drop/Fail/Withdraw (DFW) rates in the semester(s) of implementation over previous semesters positive, neutral, or negative?**

Due to the consolidation of SPSU and KSU, we don't have access to comparable students' performance data for three of the four courses. The current DFW rates are in the normal range.

Courses	Semester 1		Semester 2		Comparison
	Enrollment	DFW Rate	Enrollment	DFW Rate	
CSE 3153 Database Systems	NA	NA	31	6.5%	Positive
IT 4153 Advanced Database	NA	NA	48	21%	Positive
IT 4713 Business Intelligence Systems	NA	NA	24	4%	Neutral
IT 5433 Databases: Design & Applications	24	0%	35	9%	Negative*

Note: 1). Semester 1 refers to the semester where traditional textbook was used. Semester refers to the semester where no-cost-learning material was used. Due to the consolidation of SPSU and KSU, the student performance and enrollment of data from previous sections got lost. We use “NA” for those course sections. 2) \* The class section in semester 1 is a hybrid section. The class in semester 2 contain both online and hybrid section. Online section traditionally have higher DFW rate.

### 3b. Narrative

In the project, we used quantitative and qualitative methods to access the effectiveness of the learning material we developed.

Quantitatively, we collected student performance data (success rate, grades, DFW rate). Due to the consolidation of SPSU and KSU, we were not able to collect the student performance data of the controlled courses in previous semester. The student performance data of current courses showed the students were able to achieve their learning goals using the learning material we developed. At the end of the semester, we also conducted survey to all four participating courses to get students' opinion on the learning material. The survey results show that over 85% of the respondents think positively on the learning material used in the classes. The detailed survey results can be found in the supporting document that is submitted along with this final report.

The end of semester survey also contains open-ended questions in which students can freely express their opinion on the learning material. The analysis of the comments also showed students held a positive view on the learning material and many of them appreciated the savings of no-cost-material. Selected list of students' comments can be found in section two. All comments from the survey respondents are included in the supporting document.

#### **4. Sustainability Plan**

The IT department at KSU implemented a course architect system for all courses. A course architect updates course content based on research, publications and feedback from students and alumni. Each of instructor of record is a course architecture for corresponding courses. A course architect develops and maintains the course materials and teaching plans. He/she also teaches the course at least once a year to make sure all resources are valid and make necessary changes. This makes sure all no-cost materials and resources are highly sustainable in the future offerings of this course.

#### **5. Future Plans**

In general, this project has enhanced our visions to use free and open access learning materials in all my teaching. This enables me to customize my course content and teaching method to best reflect my experience and expertise.

Secondly, we found out that it may take more than one design-and-implement cycle to get right on the open access learning materials. We will keep revising the corresponding learning material based on our research and feedbacks from students and alumni.

#### **6. Description of Photograph**

Left-right: Dr. Lei Li, team lead, instructional designer, and instructor of record; Dr. Jack Zheng, instructional designer, and instructor of record; Dr. Svetlana Peltsverger, instructional designer, and instructor of record. Team members missing from the picture are: Dr. Rebecca Rutherford, Ms. Nancy Coylar, and Dr. Zhigang Li.
