This Grants Collection is brought to you for free and open access by the Psychology, Sociology, Anthropology, and Social Work at GALILEO Open Learning Materials. It has been accepted for inclusion in Psychology, Sociology, Anthropology, and Social Work Grants Collections by an authorized administrator of GALILEO Open Learning Materials. For more information, please contact affordablelearninggeorgia@usg.edu.
Introduction to Sociology
Grants Collection

Affordable Learning Georgia Grants Collections are intended to provide faculty with the frameworks to quickly implement or revise the same materials as a Textbook Transformation Grants team, along with the aims and lessons learned from project teams during the implementation process.

Each collection contains the following materials:

- **Linked Syllabus**
  - The syllabus should provide the framework for both direct implementation of the grant team’s selected and created materials and the adaptation/ transformation of these materials.

- **Initial Proposal**
  - The initial proposal describes the grant project’s aims in detail.

- **Final Report**
  - The final report describes the outcomes of the project and any lessons learned.

Unless otherwise indicated, all Grants Collection materials are licensed under a [Creative Commons Attribution 4.0 International License](https://creativecommons.org/licenses/by/4.0/).

| Proposal Title: | 341               |
| Proposal Category: | No-Cost-to-Students Learning Materials |
| Are you using an OpenStax textbook?: | Yes            |
| Final Semester of Instruction: | Spring 2018 |

Team Members (Name, Title, Department, Institutions if different, and email address for each):

- Jung Ha Kim, jhkim@gsu.edu, 404-413-6518
- Sarah Hepler, shepler2@gsu.edu, 404-413-4476
Sponsor, (Name, Title, Department, Institution):

Eric Wright, Department Chair, Sociology, GSU

Course Names, Course Numbers and Semesters Offered:

SOCI 1101: Introduction to Sociology, Spring 2018

List the original course materials for students (including title, whether optional or required, & cost for each item):

Discover Sociology, Required, $127

Average Number of Students per Course Section:
40

Number of Course Sections Affected by Implementation in Academic Year:
160

Average Number of Course Sections Per Semester:
Summer: 40
Fall: 60
Spring: 60

Total Number of Students Affected by Implementation in Academic Year:
6400

Requested Amount of Funding:
10500

Original per Student Cost:
127

Post-Proposal Projected Student Cost:
0

Projected Per Student Savings:
127

Projected Total Annual Student Savings:
812,800

Project Goals:

We wrote our goals/transformation in an intertwined way so pasting this chunk of text into...
In this project, we propose to incorporate an existing, peer-reviewed, no-cost OpenStax textbook into a large-format online Sociology 1101 course. One historical barrier towards student success in all of GSU’s SOCI 1101 courses has always been textbook cost. Students simply don’t buy the book on time - or ever - due to a wide variety of financial constraints. In fact, at this point in the semester Jung Ha still has many students in her current SOCI 1101 course who still do not have the book. By completely eliminating materials costs for this course, we aim to eliminate this variable preventing student success.

Our main pedagogical innovation in this course will be fostering a climate of connectivity and collaborative creativity in the course design and in the implementation of the course. In particular, we see this as a small step in connecting the Sociology departments at the GSU Downtown and GSU Perimeter campuses. Although GSU and Georgia Perimeter consolidated several years ago, there has been no systematic push to consolidate our efforts in teaching and learning across the merged departments of Sociology. We believe that this OER project could benefit administrators, faculty, staff, and students at all GSU campuses. For administrators, this course will act as a possible avenue of cross-campus programmatic assessment if it is taken up as a template. New faculty - in particular, graduate students and adjunct faculty - will benefit greatly from a ready made but infinitely customizable SOCI 1101 course. Most notably, adjuncts who are often hired in at the last minute will have access to a high-quality, American Sociological Association standards-aligned course template. Advisors, administrative assistants, and others who interface directly with students will have open access to the course design and will thus be more informed in helping students make decisions about course scheduling. The elimination of the previous textbook cost will ensure that all students have access to course materials on day one of class. Overall, we hope that this grant will help fulfill GSU’s mission of servicing students from different economic backgrounds.

Pedagogical innovations will include:

ASA Standard Application
Application of and assessment alignment with the new American Sociological Association competencies
Measurement and display of student competency attainment in Brightspace using grade items connected to the student progress tool
Relational Design
The creation of short, narrative weekly videos from the instructor tying her life to the subject matter
Highlighting excellent and interesting student work via the Announcement Tool
Fostering creative and critical writing skills by placing students in small, trusted
discussion groups
College and Career Success Focus
Integration of reflective, metacognitive assessments to foster metacognition and disciplinary thinking
Integration of content and exercises focusing on academic and career skills throughout the semester
Increased Student Ownership
Regular, responsive course check-ins throughout the semester
Responsive mid-semester GIFT (Group Instructional Feedback Technique) exercise

Statement of Transformation:
In this project, we propose to incorporate an existing, peer-reviewed, no-cost OpenStax textbook into a large-format online Sociology 1101 course. One historical barrier towards student success in all of GSU’s SOCI 1101 courses has always been textbook cost. Students simply don’t buy the book on time - or ever - due to a wide variety of financial constraints. In fact, at this point in the semester Jung Ha still has many students in her current SOCI 1101 course who still do not have the book. By completely eliminating materials costs for this course, we aim to eliminate this variable preventing student success.

Our main pedagogical innovation in this course will be fostering a climate of connectivity and collaborative creativity in the course design and in the implementation of the course. In particular, we see this as a small step in connecting the Sociology departments at the GSU Downtown and GSU Perimeter campuses. Although GSU and Georgia Perimeter consolidated several years ago, there has been no systematic push to consolidate our efforts in teaching and learning across the merged departments of Sociology. We believe that this OER project could benefit administrators, faculty, staff, and students at all GSU campuses. For administrators, this course will act as a possible avenue of cross-campus programmatic assessment if it is taken up as a template. New faculty - in particular, graduate students and adjunct faculty - will benefit greatly from a ready made but infinitely customizable SOCI 1101 course. Most notably, adjuncts who are often hired in at the last minute will have access to a high-quality, American Sociological Association standards-aligned course template. Advisors, administrative assistants, and others who interface directly with students will have open access to the course design and will thus be more informed in helping students make decisions about course scheduling. The elimination of the previous textbook cost will ensure that all students have access to course materials on day one of class. Overall, we hope that this grant will help fulfill GSU’s mission of servicing students from different economic backgrounds.

Pedagogical innovations will include:
ASA Standard Application
Application of and assessment alignment with the new American Sociological Association competencies
Measurement and display of student competency attainment in Brightspace using grade items connected to the student progress tool
Relational Design
The creation of short, narrative weekly videos from the instructor tying her life to the subject matter
Highlighting excellent and interesting student work via the Announcement Tool
Fostering creative and critical writing skills by placing students in small, trusted discussion groups
College and Career Success Focus
Integration of reflective, metacognitive assessments to foster metacognition and disciplinary thinking
Integration of content and exercises focusing on academic and career skills throughout the semester
Increased Student Ownership
Regular, responsive course check-ins throughout the semester
Responsive mid-semester GIFT (Group Instructional Feedback Technique) exercise

Transformation Action Plan:
Content Identification, Review, Selection, and Creation

OER Course materials will be identified by the grantees - SME and instructional designer - using the OpenStax website and the GALILEO Library databases. Materials will be reviewed for quality and alignment with project using 1) existing OpenStax reviews, 2) the peer-review option available in GALILEO databases, and 3) the American Sociological Association competency standards. In addition, we will ensure that content is open and legal by referring to the Fair Use Checklist developed by the USG. Once adopted, Open Stax Chapters and other OER materials will be linked to in their respective Brightspace topical modules. Additional original short, narrative, relational weekly videos will be created during the semester using Screencastify.

Course Design

The course design for SOCI 1101 is currently underway. Thus far, we have already talked extensively about Jung Ha’s course philosophy, performed a syllabus review, and adopted the American Sociological Association competencies for assessment alignment. Our next step is to design meaningful, threaded assessments to align with these competencies and with the OpenStax text. Other relevant OER’s will also be aligned with the ASA competencies. We will also use the Competencies tool in Brightspace to connect grade items to competencies. Successful and unsuccessful
competency attainment will be viewable to both students and to the instructor of record using the Progress Tool. After aligning competencies, we will develop a relational strategy. This involves, in part, the creation of small, supportive student groups and the development of discussion prompts that encourage students to tie the material to their own lived experiences. The professor will create short weekly videos during the semester using Screencastify. In this way, her videos can reflect and react to the real experiences of actual students in the course. Next, an updated, multimedia syllabus will be created once a draft of the course design is complete. After the syllabus is created, all materials will be placed in Brightspace using the Modules Tool in Content. Modules will be arranged thematically. Each module will include an Introduction, links to OER materials, Discussions, and any related Assessments. Each Module - as well as each item in the module - will be annotated using the Description function. In this way, we can provide context and justification for the different modular activities to both students and any professors who adopt the template in the future.

Team Member Roles & Activities

Jung Ha Kim will work as the subject matter expert, course-design collaborator, and instructor of record. Her responsibilities will include co-designing the course, teaching the course, and co-collecting and analyzing data. Sarah Hepler will work as the instructional designer and project manager. Her responsibilities will include co-designing the course and co-collecting and analyzing data.

Open Access Plan

Once completed, the course Brightspace Template will be exported as an XML file. This file will be placed on the ALG website with our other required materials and can be imported into other instances of Brightspace or Canvas. We will also place course materials - like the syllabus, objectives, assessments, and discussions - into a Google Doc.
Quantitative & Qualitative Measures:

Both qualitative and quantitative measures will be used to measure the effectiveness and effects of the course redesign. The two grantees and a T.A. will collaborate on data collection and analysis. Our main quantitative measures will be pre- and post-module quizzes aligned to standards set at a success threshold of 75%. Using the American Sociological Association (ASA) standards-aligned course template, students will be required to take pretest and posttest surveys of the five designated lesson plans on Brightspace. The results of these pretest and posttest surveys will be documented and analyzed by the Progress Tool in Brightspace to measure student learning outcomes. Another purpose for these pretest and posttest surveys are for students to assess their own progress of mastering course materials. While students won’t be graded on these surveys, they will be required to take them, in order to access the actual lesson plans. For instance, Module 1 components will be locked - but visible - until the Module 1 pre-test is taken and Module 2 will be completely locked until the Module 1 post-test is taken. Assessing and taking charge of how students themselves have been progressing in the course will further enhance their active participation and ownership of the educational process. This quantitative data will be compared and incorporated with qualitative data to further document learning outcome attainment success. We will use two qualitative measures of the course: beginning and end of course discussion posts and a mid-semester responsive evaluation. Here is a description of each post:

Welcome Module Discussion Post

In the Welcome module of the course, students will be required to respond to a discussion prompt focusing on expectations. The discussion prompt will read: It was great reading your responses to the Welcome discussion - I’m so glad to have you in the class and really enjoyed learning about each of you. One of the most important skills to learn as a budding sociologist is self-reflection. Throughout the course we’ll be working on our skills of reflection so let’s get
started now. In this post, you'll be reflecting on your expectations for the course. At the end of the course, we'll do the same exercise and you'll reflect on how your ideas have changed: What are your general expectations for yourself and your classmates this semester? In other words, how do you think your experience will be this semester? How do you predict that your experience this semester might affect your life after this semester is over? Although you have a textbook for this course, it is free. How do you think that not having to buy a textbook will affect your experience?

Final Module Discussion Post

In the Final module of the course, students will be required to respond to a discussion prompt reflecting on how their expectations and thinking evolved during the semester. This discussion prompt will read:

*Thank you all for participating in this course. Remember when we thought about your expectations early in the semester? Now it’s time to reflect on those expectations as well as looking towards the future. The goal of this activity is to help you reflect on your own thinking and how it has changed during the semester. To do this activity, you need to look back at what you wrote during the Welcome module. How did your experiences this semester match your expectations? How did they differ? How could you see yourself using your experiences this semester in the future? How did not having to buy a textbook affect your experience? Qualitative data will be analyzed using an iterative, thematic approach. First, a random sample of student pre/post-test discussions will be selected. We will then read through each pre-test discussion post, coding relevant sections. The same process will be carried out for the post-test discussion post. Codes will then be collapsed into themes. A midterm GIFT (Group Instructional Feedback Technique) evaluation will be carried out with the students with the help of a SOTL consultant from the Center for Excellence in Teaching and learning. This process is a small group consensus-making technique that fosters student metacognition and sense of ownership over course design. In short, a*
consultant facilitates the evaluation process and delivers an anonymous report to the instructor. The instructor then decides what - if anything - will be changed about the course and communicates this to the students. In this case, Jung Ha will make a short video to address the evaluation and any related changes. The evaluation questions are as follows: What aspects of this course ENHANCE your learning? What aspects of this course can be IMPROVED? What could YOU (as a student) do to make the course better for your classmates and the teacher? Data from this highly-structured activity will be collected and themed by the SOTL consultant. The final report will be sent to the grantees. The report will be compared with the results of our other assessment measures for patterns and disjunctures. We will use the entire body of data to inform future course decisions. In addition, where possible and appropriate, the course will be modified during the semester to meet the needs of this particular group of students.

**Timeline:**

October 1 - November 15th 2017: Course Design

- Assessment Design
- Communication Strategy
- Outcomes Alignment
- Additional OER Content Selection
- Content Creation
- Syllabus Redesign

November 15th-November 30th 2017: Brightspace Master Course buildout

January 2018: Implementation of redesigned course in one section of SOCI 1001

January 2018 - May 2018: Continuous formative evaluation of redesign with student input

May 2018: Data collection and analysis

June and July 2018: Integration of changes based on data analysis

**Budget:**
Sustainability Plan:

This course will be piloted in Spring 2018 and then made freely available to all instructors teaching Sociology 1101 at all GSU campuses. Importantly, this course will be made available as a template to adjunct instructors teaching at the GPC campuses. Thus, this template will be open to critique and collaboration from other sociologists at all campuses. This includes those faculty that are full-time, adjunct, visiting, and GRA’s. We see this as a small, non-mandatory transformative step towards fostering a culture of sharing and collaboration between the different campus units of GSU.

The course will be updated and supported each semester with help of GSU’s Center for Excellence in Teaching and Learning. Human resources at the CETL include instructional designers, multimedia designers, learning technologists, and a data science/analytics team.
September 27, 2017

Affordable Learning Georgia
Textbook Transformation Grant Program

Dear Selection Committee,

I am writing to express my strong support of the proposed project, titled “SOCI 1101, GSU” being submitted by the Center for Teaching and Learning and Dr. Jung Ha Kim, Director of Undergraduate Studies, in the Sociology Department at Georgia State University. We are particularly enthusiastic of the proposed effort because it will be incredibly helpful in addressing the financial challenges that many of students face in securing critical learning materials.

At a more general level, I believe the proposed project will be particularly innovative for our program because it will be the first cross-campus template available to all GSU/GPC professors and has the potential for subsequent cross-campus collaboration in future iterations of the course. In addition, it will help in our efforts to align our curriculum with the new guidelines released by the American Sociological Association, facilitate a more comprehensive assessment of the impact of our classroom and online-based instruction, and provide a customizable platform that will increase student engagement and metacognitive disciplinary thinking. Ultimately, I believe these innovation will help our students be more successful in their academic careers and in making a successful transition to the workforce.

Sincerely,

Eric R. Wright, Ph.D.
Chair, Department of Sociology
Second Century Initiative (2CI) Professor of Sociology and Public Health

### Narrative

**Project Goals/Statement of Transformation**

In this project, we propose to incorporate an existing, peer-reviewed, no-cost OpenStax textbook into a large-format online Sociology 1101 course. One historical barrier towards student success in all of GSU's SOCI 1101 courses has always been textbook cost. Students simply don't buy the book on time - or ever - due to a wide variety of financial constraints. In fact, at this point in the semester Jung Ha still has many students in her current SOCI 1101 course who still do not have the book. By completely eliminating materials costs for this course, we aim to eliminate this variable preventing student success.

Our main pedagogical innovation in this course will be fostering a climate of connectivity and collaborative creativity in the course design and in the implementation of the course. In particular, we see this as a small step in connecting the Sociology departments at the GSU Downtown and GSU Perimeter campuses. Although GSU and Georgia Perimeter consolidated several years ago, there has been no systematic push to consolidate our efforts in teaching and learning across the merged departments of Sociology. We believe that this OER project could benefit administrators, faculty, staff, and students at all GSU campuses. For administrators, this course will act as a possible avenue of cross-campus programmatic assessment if it is taken up as a template. New faculty - in particular, graduate students and adjunct faculty - will benefit greatly from a ready made but infinitely customizable SOCI 1101 course. Most notably, adjuncts who are often hired in at the last minute will have access to a high-quality, American Sociological Association standards-aligned course template. Advisors, administrative assistants, and others who interface directly with students will have open access to the course design and will thus be more informed in helping students make decisions about course scheduling. The elimination of the previous textbook cost will ensure that all students have access to course materials on day one of class. Overall, we hope that this grant will help fulfill GSU's mission of servicing students from different economic backgrounds.

Pedagogical innovations will include:

- **ASA Standard Application**
  - Application of and assessment alignment with the new American Sociological Association competencies
  - Measurement and display of student competency attainment in Brightspace using grade items connected to the student progress tool

- **Relational Design**
  - The creation of short, narrative weekly videos from the instructor tying her life to the subject matter
  - Highlighting excellent and interesting student work via the Announcement Tool
  - Fostering creative and critical writing skills by placing students in small, trusted discussion groups

- **College and Career Success Focus**
  - Integration of reflective, metacognitive assessments to foster metacognition and disciplinary thinking
  - Integration of content and exercises focusing on academic and career skills throughout the semester

- **Increased Student Ownership**
  - Regular, responsive course check-ins throughout the semester
  - Responsive mid-semester GIFT (Group Instructional Feedback Technique) exercise
Transformation Action Plan

Content Identification, Review, Selection, and Creation

OER Course materials will be identified by the grantees - SME and instructional designer - using the OpenStax website and the GALILEO Library databases. Materials will be reviewed for quality and alignment with project using 1) existing OpenStax reviews, 2) the peer-review option available in GALILEO databases, and 3) the American Sociological Association competency standards. In addition, we will ensure that content is open and legal by referring to the Fair Use Checklist developed by the USG. Once adopted, Open Stax Chapters and other OER materials will be linked to in their respective Brightspace topical modules. Additional original short, narrative, relational weekly videos will be created during the semester using Screencastify.

Course Design

The course design for SOCI 1101 is currently underway. Thus far, we have already talked extensively about Jung Ha’s course philosophy, performed a syllabus review, and adopted the American Sociological Association competencies for assessment alignment. Our next step is to design meaningful, threaded assessments to align with these competencies and with the OpenStax text. Other relevant OER’s will also be aligned with the ASA competencies. We will also use the Competencies tool in Brightspace to connect grade items to competencies. Successful and unsuccessful competency attainment will be viewable to both students and to the instructor of record using the Progress Tool. After aligning competencies, we will develop a relational strategy. This involves, in part, the creation of small, supportive student groups and the development of discussion prompts that encourage students to tie the material to their own lived experiences. The professor will create short weekly videos during the semester using the Description function. In this way, her videos can reflect and react to the real experiences of actual students in the course. Next, an updated, multimedia syllabus will be created once a draft of the course design is complete. After the syllabus is created, all materials will be placed in Brightspace using the Modules Tool in Content. Modules will be arranged thematically. Each module will include an Introduction, links to OER materials, Discussions, and any related Assessments. Each Module - as well as each item in the module - will be annotated using the Description function. In this way, we can provide context and justification for the different modular activities to both students and any professors who adopt the template in the future.

Team Member Roles & Activities

Jung Ha Kim will work as the subject matter expert, course-design collaborator, and instructor of record. Her responsibilities will include co-designing the course, teaching the course, and co-collecting and analyzing data. Sarah Hepler will work as the instructional designer and project manager. Her responsibilities will include co-designing the course and co-collecting and analyzing data.

Open Access Plan

Once completed, the course Brightspace Template will be exported as an XML file. This file will be placed on the ALG website with our other required materials and can be imported into other instances of Brightspace or Canvas. We will also place course materials - like the syllabus, objectives, assessments, and discussions - into a Google Doc.

Quantitative and Qualitative Measures

Both qualitative and quantitative measures will be used to measure the effectiveness and effects of the course redesign. The two grantees and a T.A. will collaborate on data collection and analysis.

Our main quantitative measures will be pre- and post-module quizzes aligned to standards set at a success threshold of 75%. Using the American Sociological Association (ASA) standards-aligned course template, students will be required to take pretest and posttest surveys of the five designated lesson plans on Brightspace. The results of these pretest and posttest surveys will be documented and analyzed by the Progress Tool in Brightspace to measure student learning outcomes. Another purpose for these pretest and posttest surveys is for students to assess their own progress of mastering course materials. While students won't be graded on these surveys, they will be required to take them, in order to access the actual lesson plans. For instance, Module 1 components will be locked - but visible - until the Module 1 pre-test is taken and Module 2 will be completely locked until the Module 1 post-test is taken. Assessing and taking charge of how students themselves have been progressing in the course will further enhance their active participation and ownership of the educational process. This quantitative data will be compared and incorporated with qualitative data to further document learning outcome attainment success.

We will use two qualitative measures of the course: beginning and end of course discussion posts and a mid-semester responsive evaluation. Here is a description of each post:

Welcome Module Discussion Post

In the Welcome module of the course, students will be required to respond to a discussion prompt focusing on expectations. The discussion prompt will read:

It was great reading your responses to the Welcome discussion - I'm so glad to have you in the class and really enjoyed learning about each of you. One of the most important skills to learn as a budding sociologist is self-reflection. Throughout the course we'll be working on our skills of reflection so let's get started now. In this post, you’ll be reflecting on your expectations for the course. At the end of the course, we’ll do the same exercise and you’ll reflect on how your ideas have changed:

- What are your general expectations for yourself and your classmates this semester? In other words, how do you think your experience will be this semester?
- How do you predict that your experience this semester might affect your life after this semester is over?
- Although you have a textbook for this course, it is free. How do you think that not having to buy a textbook will affect your experience?

Final Module Discussion Post

Although the final module discussion post is intended to be an opportunity for students to reflect on their growth and learning throughout the course, it can be used as a formative assessment to evaluate students' understanding of key concepts and their ability to synthesize information. The prompt may include questions that encourage students to reflect on their own learning journey, identify areas of strength and improvement, and consider how their knowledge has evolved over the course of the semester.
In the Final module of the course, students will be required to respond to a discussion prompt reflecting on how their expectations and thinking evolved during the semester. This discussion prompt will read:

Thank you all for participating in this course. Remember when we thought about your expectations early in the semester? Now it's time to reflect on those expectations as well as looking towards the future. The goal of this activity is to help you reflect on your own thinking and how it has changed during the semester. To do this activity, you need to look back at what you wrote during the Welcome module.

- How did your experiences this semester match your expectations? How did they differ?
- How could you see yourself using your experiences this semester in the future?
- How did not having to buy a textbook affect your experience?

Qualitative data will be analyzed using an iterative, thematic approach. First, a random sample of student pre/post-test discussions will be selected. We will then read through each pre-test discussion post, coding relevant sections. The same process will be carried out for the post-test discussion post. Codes will then be collapsed into themes.

A midterm GIFT (Group Instructional Feedback Technique) evaluation will be carried out with the students with the help of a SOTL consultant from the Center for Excellence in Teaching and Learning. This process is a small group consensus-making technique that fosters student metacognition and sense of ownership over course design. In short, a consultant facilitates the evaluation process and delivers an anonymous report to the instructor. The instructor then decides what - if anything - will be changed about the course and communicates this to the students. In this case, Jung Ha will make a short video to address the evaluation and any related changes. The evaluation questions are as follows:

- What aspects of this course ENHANCE your learning?
- What aspects of this course can be IMPROVED?
- What could YOU (as a student) do to make the course better for your classmates and the teacher?

Data from this highly-structured activity will be collected and themed by the SOTL consultant. The final report will be sent to the grantees. The report will be compared with the results of our other assessment measures for patterns and disjunctures. We will use the entire body of data to inform future course decisions. In addition, where possible and appropriate, the course will be modified during the semester to meet the needs of this particular group of students.

**Timeline**

**October 1 - November 15th 2017:** Course Design
- Assessment Design
- Communication Strategy
- Outcomes Alignment
- Additional OER Content Selection
- Content Creation
- Syllabus Redesign

**November 15th-November 30th 2017:** Brightspace Master Course buildout

**January 2018:** Implementation of redesigned course in one section of SOCI 1001

**January 2018 - May 2018:** Continuous formative evaluation of redesign with student input

**May 2018:** Data collection and analysis

**June and July 2018:** Integration of changes based on data analysis

**Budget**

Jung Ha Kim: $5,000
Sarah Hepler: $5,000
Travel: $800

**Sustainability Plan**

This course will be piloted in Spring 2018 and then made freely available to all instructors teaching Sociology 1011 at all GSU campuses. Importantly, this course will be made available as a template to adjunct instructors teaching at the GPC campuses. Thus, this template will be open to critique and collaboration from other sociologists at all campuses. This includes those faculty that are full-time, adjunct, visiting, and GRA's. We see this as a small, non-mandatory transformative step towards fostering a culture of sharing and collaboration between the different campus units of GSU.

The course will be updated and supported each semester with help of GSU’s Center for Excellence in Teaching and Learning. Human resources at the CETL include instructional designers, multimedia designers, learning technologists, and a data science/analytics team.
September 27, 2017

Affordable Learning Georgia
Textbook Transformation Grant Program

Dear Selection Committee,

I am writing to express my strong support of the proposed project, titled “SOCI 1101, GSU” being submitted by the Center for Teaching and Learning and Dr. Jung Ha Kim, Director of Undergraduate Studies, in the Sociology Department at Georgia State University. We are particularly enthusiastic of the proposed effort because it will be incredibly helpful in addressing the financial challenges that many of our students face in securing critical learning materials.

At a more general level, I believe the proposed project will be particularly innovative for our program because it will be the first cross-campus template available to all GSU/GPC professors and has the potential for subsequent cross-campus collaboration in future iterations of the course. In addition, it will help in our efforts to align our curriculum with the new guidelines released by the American Sociological Association, facilitate a more comprehensive assessment of the impact of our classroom and online-based instruction, and provide a customizable platform that will increase student engagement and metacognitive disciplinary thinking. Ultimately, I believe these innovations will help our students be more successful in their academic careers and in making a successful transition to the workforce.

Sincerely,

Eric R. Wright, Ph.D.
Chair, Department of Sociology
Second Century Initiative (SCI) Professor of Sociology and Public Health
Soc. 1101(L): Introduction to Sociology
Spring 2018
Online Course (CRN 20759)

Instructor: Jung Ha Kim, Ph.D.
Contact Info.: jhkim@gsu.edu; 1073 Langdale Hall, GSU.
Office Hours: 1-2 p.m. (Thurs) online; 3:30-4:30 (Wed) onsite.

Course Description and Objectives:

This is an ONLINE course designed to introduce sociology as a scientific study of human society. The course is largely divided into the following areas of study: thinking sociologically, acquiring sociological research skills, examining social stratifications, analyzing social institutions, and suggesting solutions and/or policies to address social problems.

Accordingly, there are five main modules, along with an introductory module and a course synthesis and evaluation module. Each main module will cover the following lessons:

Module 1: Introduction
Module 2: the Sociological Eye (perspectives, theories and research methods in Sociology)
Module 3: Socialization (development of the social self, social interactions and structures)
Module 4: Social Stratification (inequalities based on SES, Race & Ethnicity, gender & Sex, and Aging)
Module 5: Social Structures (social institutions, such as family, religion, mass media and technology)
Module 6: Social Changes and Social reproduction (urbanization, demography, social movements and social changes)
Module 7: Course synthesis and Assessment

The overall objective of the course is, then, to acquire and apply sociological tools to better understand human interactions and critically examine social phenomena.

The textbook
We will be using the OpenStax Textbook: Introduction to Sociology (2nd ed., 2017)
https://openstax.org/details/books/introduction-sociology-2e

PDF VERSION ISBN-13 978-1-947172-11-1

There is no cost to students for accessing the textbook on the website. (If desired, students may order the printed version with at a low cost.)

Course Requirements and Policies:

1. PARTICIPATION:
- This is an online course. Each and every individual student may participate in the course based on one’s own schedule and pace. In order to actively participate in the small group discussions, however,
all readings and assignments need to be conducted during the designated period of the specific modules.
- The instructor reserves her right to DROP students who do not check in with the group members and do not participate in the first assignment.
- The instructor also reserves her right to DROP students who miss two consecutive assignments. If such withdrawal happens before the midpoint of the semester, students will earn “W”; if withdrawal happens post-midpoint, then, students will automatically earn “WF”
- Students may be dropped from the class for non-payments (usually after the second week of classes and occasionally throughout the semester). If students intend to remain in the course, they MUST continue to participate and carry on with all coursework. The Registrar’s Office may also drop students from iCollege at multiple junctures throughout the semester. Students are responsible for monitoring their status in the course and inform the instructor to add them on iCollege when drooped from the course. Nonparticipation and missing work due to being dropped will not be excused.

2. READINGS:
- Students are expected to allocate enough time to complete all readings. Normally, students are expected to spend at least 2 hours outside of class per each hour spent in the classroom on readings and assignments. (That is, spending at least 5 hours per week, besides the class meeting.)
- Readings, short clips, and sharing of various perspectives in the class maybe sensitive and personal at times. While students are not expected to agree or accept every opinions and interpretation that are presented in the class, they are expected to be open-minded and willing to stretch their perspectives to learn from different people/texts/experiences.

3. EXAMINATIONS:
- There will be two examinations in this course.
- Each examination will be comprised of approximately 75 -100 short answer questions (mostly multiple choices, true and false, and possibly some matching).
- Since exams can be taken by students based on their own readiness and schedule, there will be no make-up exam.
- There will be no final exam (i.e., a cumulative and comprehensive exam to cover the entire course lesson) in this class

4. ASSIGNMENTS:
- There are 5 required assignments that are due on the designated dates of the specific modules.

Instructions for writing assignments
   a. The length: all 5 writing assignments need to be at least 3 pages of length.
   b. The margins and font: all writing assignments need to be typed and double-spaced. Use “Times New Roman” with font size 12 (and not larger than 12 font size), and 1” margins all around (both right and left, and top and bottom). Used single-spaced format to write your name, discussion group info/name, and the number of writing assignment on the top of the first page of all assignments.
   c. There is no required or preferred style of writing (e.g., APA or MLA). However, up to 10 points will be deducted for consistent and/or excessive errors, such as spelling, grammar, punctuation, etc.
   d. There is no outside sources (website, printed materials, journal, etc.) or additional research required for writing assignments, unless specified. However, if students use any outside sources, they are responsible for providing a full citation (not only as a list of sources at the end
of the paper but also in the text throughout). Failure to cite the sources IS plagiarism (see below on “academic (dis)honesty” for further info.). Without exception, the paper grade will be automatically zero (0), when detected with plagiarism and students will not be allowed to rework on that particular assignment.

c. All writing assignment is to be submitted via iCollege on the designated period of the module. Assignments submitted late may suffer missing the small group peer review process, which will result in a reduction of the grade. (See below for the grading system.)

5. Peer reviews:
Instructions for critically engaging in peer evaluations

a. This course assumes that everyone is a learner and a teacher and that everyone is mutually responsible for participating in the educational process.

b. All writing assignments need to be posted on the small group discussion board on the designated date (the same time that you submit the writing assignment, please, remember to upload the paper on the discussion board, too.)

c. You are to read and review EVERY group members' papers that were posted. However, if a member of the group did not post the paper until 2 days prior to the peer review is due, you are NOT responsible for reviewing it.

d. The peer review needs to be approximately 200 words initially.

e. The main objective of the peer review is to help the group members to improve the paper contents and further stimulate mutually beneficial educational experience. Hence, sharing one’s own perspectives, suggesting different sociological concepts or theories, or making concrete recommendations to improve the work of group members are expected.

f. At no point, insensitive and/or hurtful personal attack is permitted. In case of inappropriate feedbacks to group mates’ work ever occurs, the instructor reserves her right to either reassign the group and/or terminate the student(s) access to small group discussion board.

g. After the initial peer reviews from other members of the discussion group, students are expected to freely engage in further comments, observations, and questions as they see fit.

6. ACADEMIC (DIS)HONESTY
- In case of plagiarism and cheating (e.g., generated from online paper warehouses, friends, printed materials, etc.), the student will get automatically get zero (0) as the grade for the writing assignment.
- Violation of the Academic Honesty policy will result in an F in the course and possible disciplinary action. All violations will be formally reported to the Dean of Arts and Sciences. The University’s policy on academic honesty can be found at http://www2.gsu.edu/~wwwfhb/sec409.html
- The university’s policy on academic honesty is published in the Undergraduate Curricular Affairs Handbook (and the Faculty Affairs Handbook), which is available to all members of the university community. Lack of knowledge of this policy is not an acceptable defense to any charge of academic dishonesty.

7. STUDENT ACCOMMODATION POLICY
- Students who wish to request accommodation for a disability may do so by contacting the Office of Disability Services.
- Students without the Office of Disability Services’ issuance will not be accommodated.
- It is students’ responsibility to notify the instructor of all classes in which accommodations are sought. Students need to notify in writing in the first week of classes that they are registered with disability services and make a copy of the form from the Office of Disability Services for the instructor.

8. EMAIL GUIDELINES
- Students are expected to conduct themselves professionally at all times, including email communication.
- Students need to use GSU-issued student email account to communicate with the instructor. The instructor is not responsible to reply to messages sent from students’ personal email accounts.
- Do NOT send email messages via iCollege to the Instructor. The instructor will not respond if students send messages via iCollege.
- When inquiring about specifically grade-related questions, please remember to include PANTHER ID. Otherwise, the instructor will not release grade-related information via email.
- While the instructor will check e-mail messages regularly, it is ultimately students’ responsibility to follow course-work related instructions listed in this syllabus. And please, refer to the syllabus, before asking mechanical questions via e-mail.

** In this semester, I will be working with a few GRA/GTA (Graduate Student Research/Teaching Assistants). I will share their names and contact info on iCollege as the semester progresses.

The Grading System:

- Grades are not negotiable.
- No 'incomplete will be given, except in cases of extreme personal emergency/health situation affecting the final grade. Written documents of physicians or other official persons need to be submitted to be considered by the instructor.
- Feb 27, 2018 is the last day to drop the course and possibly receive a “W”

Exam I & II (100 points each): 200 points
5 Assignments (50 points each): 250 points
5 Assignment Peer Reviews (50 points each): 250 points

Final Report
General Information

Date: 05/25/18
Grant Round: 10
Grant Number: 341
Institution Name(s): Georgia State
Project Lead: Sarah Hepler
Team Members (Name, Title, Department, Institutions if different, and email address for each):

Jung Ha Kim, Jung Ha Kim, Principal Senior Lecturer & Director of Undergraduate Studies, Sociology, jhkim@gsu.edu, 404-413-6518
Sarah Hepler, Manager of Instructional Design, Center for Excellence in Teaching and Learning, shepler2@gsu.edu, 404-413-4476

Course Name(s) and Course Numbers: Sociology 1101: Intro to Sociology
Semester Project Began: Fall 2018
Final Semester of Implementation: Spring 2018
Total Number of Students Affected During Project: 130

1. Narrative
For the narrative, please see a blog I posted about it several weeks ago on the project.

2. Quotes

“The writing assignments help me better my understanding of the textbook, and the assignments help me better my writing skills”

“Honestly, the best part of this course is being able to communicate with everyone else in it. Everyone’s peer review offers different perspective and help me understand the course even better”

“More readings from outside the book”

Three students also mentioned the grading process as “slow” and “in need of improvement” especially during the modules 1 and 2.

“Be unbiased in my reviews of papers and take my criticism well. Hopefully be able to give my professor good information that can help future students, too”

3. Quantitative and Qualitative Measures

3a. Uniform Measurements Questions
Student Opinion of Materials
Was the overall student opinion about the materials used in the course positive, neutral, or negative?
Total number of students affected in this project: 128
   - Positive: 90 % of 63 number of respondents
   - Neutral: 5 % of 63 number of respondents
   - Negative: 5% of 63 number of respondents

These numbers are based on the Final Discussion discussed below.

Student Learning Outcomes and Grades

Was the overall comparative impact on student performance in terms of learning outcomes and grades in the semester(s) of implementation over previous semesters positive, neutral, or negative?
Choose One:
   - x Positive: Higher performance outcomes measured over previous semester(s)
   - ___ Neutral: Same performance outcomes over previous semester(s)
   - ___ Negative: Lower performance outcomes over previous semester(s)

Student Drop/Fail/Withdraw (DFW) Rates
Was the overall comparative impact on Drop/Fail/Withdraw (DFW) rates in the semester(s) of implementation over previous semesters positive, neutral, or negative?

Drop/Fail/Withdraw Rate:
Depending on what you and your institution can measure, this may also be known as a drop/failure rate or a withdraw/failure rate.

___33.6____% of students, out of a total 130 students affected, dropped/failed/withdrew from the course in the final semester of implementation.

Choose One:
·   _x__ Positive: This is a lower percentage of students with D/F/W than previous semester(s)
·   ___ Neutral: This is the same percentage of students with D/F/W than previous semester(s)
·   ___ Negative: This is a higher percentage of students with D/F/W than previous semester(s)

3b. Measures Narrative
Both qualitative and quantitative measures were used to measure the effectiveness and effects of the course redesign. The two grantees and a T.A. will collaborate on data collection and analysis.

Quantitative Measures

Outcomes Attainment
Our main quantitative measures were pre- and post-module quizzes aligned to standards set at a success threshold of 75%. Using the American Sociological Association (ASA) standards-aligned course template, students will be required to take pretest and posttest surveys of the five designated lesson plans on Brightspace. The results of these pretest and posttest surveys were documented and analyzed by the Progress Tool in Brightspace to measure student learning outcomes. Another purpose for these pretest and posttest surveys were for students to assess their own progress of mastering course materials. While students weren’t be graded on these surveys, they were required to take them, in order to access the actual lesson plans. For instance, Module 1 components were locked - but visible - until the Module 1 pre-test was taken and Module 2 was completely locked until the Module 1 post-test was taken.
Objectives Progress

1. Describe the role of theory in building sociological knowledge and evaluate the limitations of different theoretical frameworks
   - 100% (1/1) Complete: 1/1 Achieved
   - 1 Activities, 0 Objectives
   - Updated: Mar 28, 2018, 12:35 PM

2. Critically evaluate claims about the social world by identifying and applying assumptions underlying theory construction and social policy, deductively deriving theories from assumptions, and inductively moving from evidence to theoretical statements.
   - 100% (1/1) Complete: 1/1 Achieved
   - 2 Activities, 2 Objectives
   - Updated: Mar 28, 2018, 12:35 PM

3. Describe the role of social research methods in building sociological knowledge
   - 100% (1/1) Complete: 1/1 Achieved
   - 1 Activities, 0 Objectives
   - Updated: Mar 28, 2018, 12:35 PM

4. Identify and evaluate methodological approaches and the design of empirical research including sampling, measurement, and data reduction
   - 100% (1/1) Complete: 1/1 Achieved
   - 1 Activities, 0 Objectives
   - Updated: Mar 28, 2018, 12:35 PM

5. Conduct and utilize empirical research through the articulation of the effective use of evidence, the presentation of research questions or hypotheses from conceptual theories and methods, and the recognition of the limits of the study method in an appropriate context.
   - 100% (1/1) Complete: 1/1 Achieved
   - 5 Activities, 0 Objectives
   - Updated: Mar 28, 2018, 12:35 PM

6. Express sociological ideas in a clear and coherent manner, both written and oral communication, to the general public.
   - 100% (1/1) Complete: 1/1 Achieved
   - 1 Activities, 0 Objectives
   - Updated: Mar 28, 2018, 12:35 PM

7. Demonstrate information, technological, and quantitative literacy.
   - 100% (1/1) Complete: 1/1 Achieved
   - 1 Activities, 0 Objectives
   - Updated: Mar 28, 2018, 12:35 PM

8. Demonstrate an understanding of the kinds of work sociologists do, including an awareness of how sociology is used in clinical and applied settings, and the value of sociological knowledge and skills in the workplace.
   - 100% (1/1) Complete: 1/1 Achieved
   - 1 Activities, 0 Objectives
   - Updated: Mar 28, 2018, 12:35 PM
Students were highly successful in meeting this 75% threshold on the 8 identified learning objectives:
- 111 completed and mastered all 8 learning objectives
- 17 Didn’t engage with all 8
- 10 completed but needed more remediation on at least one

Grades
Here are the Spring ‘18 vs Spring ‘17 Grades and DFW. There was a 78% improvement in student final grade under the new course design and a 14% reduction in DFWs.

Qualitative Measures
We used two qualitative measures of the course: beginning and end of course discussion posts and a mid semester responsive evaluation.

Here is a description of each post:

Welcome Module Discussion Post
In the Welcome module of the course, students were required to respond to a discussion prompt focusing on expectations. The discussion prompt read: It was great reading your responses to the Welcome discussion - I’m so glad to have you in the class and really enjoyed learning about each of you. One of the most important skills to learn as a budding sociologist is self reflection. Throughout the course we’ll be working on our skills of reflection so let’s get started now. In this post, you’ll be reflecting on your expectations for the course. At the end of the course, we’ll do the same exercise and you’ll reflect on how your ideas have changed: What are your general expectations for yourself and your classmates this semester? In other words, how do you think your experience will be this semester? How do you predict that your experience this semester might affect your life after this semester is over? Although you have a textbook for this course, it is free. How do you think that not having to buy a textbook will affect your experience?

Final Module Discussion Post
In the Final module of the course, students were required to respond to a discussion prompt reflecting on how their expectations and thinking evolved during the semester. This discussion prompt read: Thank you all for participating in this course. Remember when we thought about your expectations early in the semester? Now it’s time to reflect on those expectations as well as looking towards the future. The goal of this activity is to help you reflect on your own thinking and how it has changed during the semester. To do this activity, you need to look back at what you wrote during the Welcome module. How did your experiences this semester match your expectations? How did they differ? How could you see yourself using your experiences this semester in the future? How did not having to buy a textbook affect your experience?

Qualitative data were analyzed using an iterative, thematic approach. First, a random sample of student pre/post-test discussions will be selected. We will then read through each pre-test discussion post, coding relevant sections. The same process will be carried out for the post-test discussion post. Codes will then be collapsed into themes.

Midterm Evaluation
A midterm GIFT (Group Instructional Feedback Technique) evaluation was carried out by the two PI’s on this project. We received 59 responses. The results were collated and themed and then shared with the students. Jung Ha made several small tweaks to the course based on this process:
4. Sustainability Plan

This course will be made freely available to all instructors teaching Sociology 1101 at all GSU campuses. Importantly, this course will be made available as a template to adjunct instructors teaching at the GPC campuses. Thus, this template will be open to critique and collaboration from other sociologists at all campuses. This includes those faculty that are full-time, adjunct, visiting, and GRA’s. We see this as a small, non-mandatory transformative step towards fostering a culture of sharing and collaboration between the different campus units of GSU. The course will be updated and supported each semester with help of GSU’s Center for Excellence in Teaching and Learning. Human resources at the CETL include instructional designers, multimedia designers, learning technologists, and a data science/analytics team.
5. Future Plans

- The success of this project has already begun to affect the content selection choices of other Sociology professors. In addition, the Center for Excellence in Teaching and Learning is currently seeking other OER grant opportunities to infuse free, reusable content in as many of our courses as possible.
- We presented our project at the Teaching and Learning Conference in Spring 2018. We also published a blog on the finished product and process. We will continue to write and think about OER in future designs and as the online programs expand at GSU.
